THE ORIGIN OF GRINDERS

XGi TECHNOLOGY

PERFECTION, MADE SIMPLE.

A Fiorenzato grinder always offers the best, even under extreme operating conditions. And with XGi, the best just got better.

Thanks to this innovative technology the quantity of coffee dispensed, calculated in grams, needs only be set once, thus guaranteeing precise doses and less waste. The weight is constantly re-calculated, taking into account grinding adjustments, atmospheric influences, pressure and blades wear – even though, with the stunning Red Speed technology, XGi blades last up to four times longer than normal ones – always offering consistently perfect cups.

Touch display.
